

Even in places where precautions have been put in place to reduce mould growth, the ambient temperature and humidity within enclosed spaces will naturally vary. It's therefore vital to know whenever conditions for fast mould growth still occur.

The winter months are prime time for mould infestations with window and doors closed up. During this time your property lacks any kind of ventilation, causing a build-up of humid air which can develop into condensation, creating the perfect conditions for mould growth.

Monitoring the temperature and humidity is as important for the health of the building as ensuring adequate ventilation. It also helps protect the health of everyone living or working there.

Cloud-connected monitoring systems – complete peace of mind

Cloud-based monitoring systems are an inexpensive way to continuously monitor a single location, or multiple buildings or areas within a building. Our Cloud-connected data loggers are therefore perfect for remotely monitoring the inside of your properties.

- Fully automated data logging with secure Cloud storage
- Monitor multiple locations 24/7 from any internet connected device
- Live notifications by email and text
- EasyLog App and website

EL-WiFi-TH

- Temperature and humidity Cloud-connected wireless data logger
- Set your own high and low alarm levels
- Stores data internally if the wireless connection is lost
- Display shows live readings and status

Did You Know? prolonged exposure to mould may cause a variety of allergy symptoms and other serious health issues?

EL-SIE-2

- Measures temperature and humidity
- Plug into your PC to download readings
- Set your own high and low alarm levels
- Lights and sounder to warn of alarms
- Display shows live readings and status
- Data can be uploaded to the Cloud

Did You Know? there are over 10,000 species of mould?

Wireless Alert TH

This small unit continuously monitors ambient temperature and humidity, perfect for discrete monitoring.

- Set up in moments, setting high and low alerts in the Wireless Alert App
- Automatically sends email alarm notifications to your specified recipients
- Alarm light to show if an alert is active

Conditions that Cause Mould Growth

The damage caused by mould can be vast, with the long term effects being devastating to your business, your property and to the health of those connected to it.

We recently looked into the contributing factors of mould growth, what mould feeds on and how best to monitor the conditions inside your property to keep mould at bay.
